## Sequencer with remote control for RGB strip

Design iGuzzini

iGuzzini

Last information update: December 2023

### Accessory code

MWF9: Sequencer with remote control for RGB strip

---

### Technical description

12V dc PWM sequencer (dimmmable 1-10V) - with radio control; allows a limited set of sequences and colour cycles (consult the manual included in the pack). Use of the sequencer allows a maximum of 2 consecutive strips (10 m); for longer lengths, this product can be used as a master and combined with MWG0 as the slave; with this solution 2 strips can be added one after another for each MWG0 slave used; therefore it is important to precisely calculate the total load of the strips used so as to select a suitable ballast.

---

### Installation

connect up using the connectors included in the pack; ballast protection rating: IP20

---

### Colour

Indeterminate (00)

---

### Weight (Kg)

0.12

---

Complies with EN60598-1 and pertinent regulations
