Accessory code

PC97: Plate for pendant coupling - Spring locking system

Technical description

Plate for pendant coupling. The accessory must be ordered for each product that needs to be pendant-installed. Steel spring coupling system - this system allows all preliminary wiring and installation operations to be performed on modules that form a multiple composition and to secure them practically, rapidly and tool-free. Set up to house the tubular rods required for the structural framework of the system. For compositions that are already installed, the spring solution allows successive inspections and maintenance to be performed without disassembling the modules.

Installation

Important: consult the instruction sheet. Kit required for each module to be pendant-mounted. Rapid securing system with steel springs.

Colour

Indeterminate (00) | Black (04)

Weight (Kg)

0.86

Mounting

ceiling surface

Notes

This pendant system includes a spring coupling system that may not suit the style of certain specific installations. An alternative system is available that features a mechanical securing system with screws and is therefore more suitable for exposed solutions.

Complies with EN60598-1 and pertinent regulations
