IT Nella progettazione dell'impianto illuminotecnico ed elettrico, determinare le correnti massime ammissibili, considerando i seguenti fattori:

- corrente nominale ammessa dalle morsettiere
- coefficiente di sicurezza per tenere conto delle sovratensioni e contemporaneità;
- corrente nominale assorbita dai singoli art.

EN When planning the lighting and electrical system, determine the maximum permitted current, taking into account the following factors:

- the nominal current permitted by terminal blocks
- safety coefficient to allow for excess voltage and contemporaneity;
- the nominal current absorbed by single modules (see table).
