Course Description

Overall, learners will gain a comprehensive understanding of exterior lighting principles and will be equipped with the skills and knowledge necessary to create sustainable, visually appealing, and functional lighting solutions for a variety of outdoor spaces.

Learning Objectives

1. Demonstrate prerequisite technical knowledge required for exterior lighting.
2. Recommend appropriate lighting solutions for exterior spaces based on factors such as functionality, safety, and aesthetics.
3. Comply with Green Building Council requirements related to exterior lighting design.
4. Meet International Dark Sky Association (IDA) criteria for reducing light pollution and preserving dark skies.
5. Identify and apply exterior lighting design trends and best practices to create effective lighting solutions that meet client needs and industry standards.
