Last information update: December 2023

Accessory code

MZ41: L joint

Technical description

L-shaped joint for low voltage track in Minimal version (trimless flush with ceiling). This allows a directional change of 90° to be made between two consecutive tracks on the same plane. A swivel joint allows fine adjustments to be made to remedy any discrepancies in the right angle. Electrical and mechanical connection. An L-shaped reinforcement plate is included for the track profiles.

Installation

Mechanical connection on track

Colour

White (01) | Black (04)

Weight (Kg)

0.04

Wiring

Consult the instruction sheet

Notes

The package includes protective labels for the unused holes on the track profiles.

Complies with EN60598-1 and pertinent regulations
