Accessory code
X775: Frame with a transversal louvre that can be installed on a Linealuce 27 surface Full Remote - L=329mm

Technical description
Accessory made up of two parts: an installation frame and a transversal louvre that can be installed on a Linealuce 27 surface Full Remote L= 329mm. The extruded aluminium installation frame is subjected to a multi-step, pre-treatment process, in which the main phases are degreasing, fluorozirconation (a protective surface film) and sealing (with a nano-structured silane layer). The following painting stage consists of a primer and a liquid acrylic paint, cured at 150°C, with a high level of weather and UV ray resistance. The installation frame will be available in 4 finishes. There are polycarbonate closure caps with an opening for water outflow in the final part of the frame. The transversal louvre is made of liquid painted aluminium and is always black. The accessory can be installed on the product using the screws and stainless steel screws and washers supplied with the code, in a separate bag. The cut-off angle for the frame accessory with a transversal louvre is 40°.

Colour	Weight (Kg)
White (01) | Black (04) | Grey (15) | Rust Brown (F5)	0.15

Mounting
wall arm|wall surface|ceiling surface

Notes
For more information on the possibility of installing the accessory with the various Linealuce 27 surface Full Remote optics, consult the instruction sheet.

Complies with EN60598-1 and pertinent regulations
